

US Tarp Flatbed Tarps come in a variety of sizes to help protect heavy or bulky cargo from hostile environments. We stock 3 popular sizes of flatbed tarps for quick shipment and we can manufacture custom products to meet your high volume needs.

STEEL & LUMBER TARPS

Designed to be used in sets protecting long loads of various size our steel and lumber tarps feature durable 18 oz vinyl, brass grommets and two or three rows of steel D-rings.

27' x 16' Steel Tarp is preferred for lower height loads such as stacked sheet steel, rebar or cold rolled bundles and heavy flat stock. The "steel" tarp includes a 4' drop flap and 2 rows of D-rings.

27' x 20' Short Lumber Tarp has a 6' drop flap and two rows of D-rings and is often used on loads of dimensional lumber, composites, drywall and other bulky or heavy load applications.

27' x 24' Tall Lumber Tarp covers big, high, bulky loads. This tarp includes an 8' drop and three rows of D-rings on the drop and along the sides. The "tall lumber" tarp is perfect for insulation, foamboard, pallets of doors and window, light machinery, and implements.

MACHINE TARPS

Heavy Duty flatbed tarps, often called machine tarps, smoke tarps or gappers, can be used to cover odd sized equipment, coiled steel, or to bridge the gap between a shortened front and rear of steel or lumber tarps. US Tarp 20' x 20' 18oz vinyl machine tarp includes 12 rows of heavy duty steel D-rings.

Grommets & D-Rings

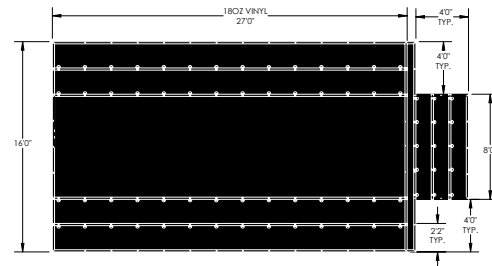

US Tarp Flatbed Tarps come with extra durable seat belt webbing reinforcement and 2 foot grommet and D-ring spacing.

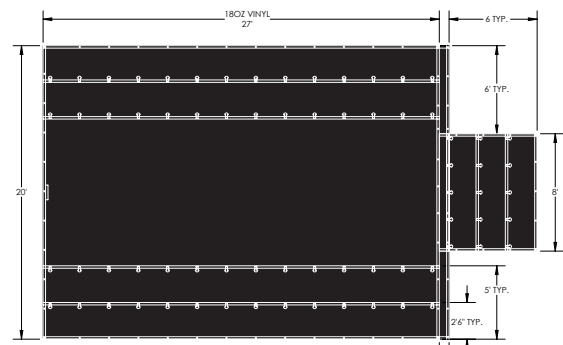

Durable 18oz Vinyl

All flatbed tarps are black 18oz PVC coated polyester vinyl, a durable option across applications.

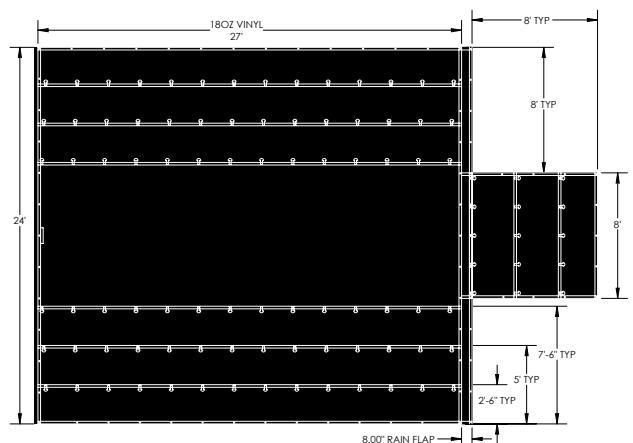

27' x 16' Steel Tarp
